Professional Summary

Java Developer with a degree in Systems Analysis and Development and an AWS Certified Cloud Practitioner certification, with hands-on experience building and deploying web applications and REST APIs using Java, Spring Boot, Spring Security, JPA, MySQL, Maven, Docker, and AWS. Experienced in production-oriented applications involving business logic, authentication, authorization, automated testing, and cloud infrastructure.

Experience

Wise Systems

Software Development Trainee

Remote

Apr 2026 – Jun 2026

- Developed **Dentix**, a full-stack dental clinic management system using Java 17, Spring Boot, MySQL, and Angular, supporting patient, dentist, appointment, reporting, and financial workflows.
- Built a REST API with **60 endpoints**, implementing Spring Security, JWT, RBAC, BCrypt, and two-factor authentication (2FA), along with business rules for appointment scheduling, rescheduling, cancellation, and conflict validation.
- Integrated the Angular/TypeScript frontend with the REST API, containerized the application using Docker Compose, and deployed it to AWS EC2 with Nginx and HTTPS.

Conselho da Comunidade – Paranagua

Internal System Development – CCControl

Paranagua, Brazil

Jul 2025 – Feb 2026

Official position: Administrative Intern – Jan 2024 – Feb 2026

- Conceived and developed **CCControl**, an institutional system used in day-to-day operations to automate the monitoring of individuals serving alternative sentences.
- Automated a workflow previously based on the manual review of more than **200 physical records**, implementing automatic status classification and scheduled processing with Java 17, Spring Boot, JPA/Hibernate, and MySQL.
- Developed **24 HTTP routes** using Spring MVC controllers and implemented Spring Security, BCrypt, RBAC, 2FA, reports, and dashboards; deployed the application to AWS EC2 with Docker Compose and MySQL running on an internal network.

Projects

Eliane Imoveis

Commercial Real Estate Web Application

2026

- Developed a production full-stack application using Java, Spring Boot, Angular 19, TypeScript, and MySQL, featuring a public property catalog and an administrative property management dashboard.
- Built a REST API with **17 endpoints**, including public queries, administrative CRUD operations, image management, and authentication with Spring Security and JWT.
- Containerized the application with Docker Compose and deployed it to AWS Lightsail using Nginx, a custom domain, DNS configuration, and HTTPS/SSL.

Java REST API with CI/CD Pipeline

DevOps Academic Project

2026

- Developed a Java REST API with a CI/CD pipeline using GitHub Actions, automated testing with JUnit and Mockito, Docker containerization, and pipeline notifications through Discord.

Certifications

- **AWS Certified Cloud Practitioner** – Amazon Web Services (AWS), 2026

Skills

- **Backend:** Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, Maven, Microservices, Apache Kafka
- **Frontend:** Angular, TypeScript
- **Databases:** SQL, MySQL, PostgreSQL
- **Cloud & DevOps:** AWS (IAM, EC2, S3, RDS, DynamoDB, Lightsail, Lambda), Docker, Docker Compose, Nginx, GitHub Actions, Git/GitHub, CI/CD
- **Testing & Languages:** JUnit, Mockito; Portuguese (Native), English (Advanced)

Education

Pontifical Catholic University of Parana

Technology Degree in Systems Analysis and Development

Curitiba, Brazil

Feb 2024 – Aug 2026
